Research Interests

My research focuses on agentic AI and language models, particularly reasoning processes and emergent properties.

Education

B.S. KAIST , B.S. in Computer Science & Artificial Intelligence – Daejeon, South Korea	Mar 2021 – Aug 2027
• Degree period includes 18 months of mandatory military service.	
New York University , Exchange Student in Computer Science – New York, USA	Sept 2023 – Dec 2023

Experience

KAIST Computer Vision Lab , Research Intern	Sept 2025 – present
• Conducted research on agentic AI and language models.	
• Submitted 4 papers as co-author to top conferences (AAAI, ICLR, NAACL)	
Republic of Korea Army , Sergeant	Mar 2024 – Sept 2025
KAIST Concurrency and Parallelism Lab , Research Student	Dec 2023 – Feb 2024
NYU Data Analytics Visualization Team , Research Student	Aug 2023 – Dec 2023
KAIST Computer Architecture and Systems Lab , Research Intern	June 2023 – Aug 2023

Research

AgentRVOS: Reasoning Over Object Tracks for Zero-Shot Referring Video Object Segmentation

Woojeong Jin, Jaeho Lee, Heeseong Shin, **Seungho Jang**, Junhwan Heo, Seungryong Kim
arxiv.org/abs/2603.23489 (AAAI 2027, under review)

- Conceived and implemented iterative spatio-temporal pruning to refine object candidates and temporal scope.
- Achieved state-of-the-art performance in training-free RVOS with iterative spatio-temporal pruning.

PLAYGROUND: Progressive Layout Generation with Render-Grounded Planning

Jaeho Lee, Junhwan Heo, Junghyun Park, Eunju Yang, **Seungho Jang**, Seongchan Kim, Wonjun Moon, Seungryong Kim
(ICLR 2027, under review)

- Proposed closed-loop layout planning that adapts to feedback from the rendered canvas.
- Conducted visual verifier fine-tuning experiments for candidate assessment and layout refinement.

Ask4NV: Can Learning to Answer Spatial Questions Improve Novel-View Generation?

Jahyeok Koo, Hyeonseo Yu, **Seungho Jang**, Jaewoo Jung, Jiwon Kang, Seokju Cho, Seungryong Kim
(ICLR 2027, under review)

- Proposed a joint training method for 3D language understanding and novel-view generation.
- Evaluated image fidelity and geometric consistency across four in-domain and out-of-domain datasets.

ReAnchor: Speculative Decoding in Discrete Diffusion

Sanghyun Lee, Jaeho Lee, Jiho Park, Wonjin Nam, **Seungho Jang**, Seungryong Kim
(NAACL 2027, in preparation)

- Empirically demonstrated the predictive value of draft tokens discarded after rejection.
- Experimentally evaluated learning-based reuse of rejected-prefix hidden states as a design alternative.

Honors & Awards

Samsung Research Scholarship Samsung Research	Sept 2025 – present
National Defense Public Data Utilization Competition Grand Prize Ministry of National Defense ItDae IpDae: Integrated search service for military enlistment options	Aug 2024
Google Solution Challenge Global Top 100 Google The Voice: Phone scam detector for seniors using conversation content	May 2023
National Scholarship for Science and Engineering Korea Student Aid Foundation	Mar 2021 – present

Extracurricular Activities

Include (KAIST Artificial Intelligence Club) , Academic Planning Team - Facilitated weekly computer vision and natural language processing seminars. - Organized internal hackathons and academic conferences.	Mar 2026 – present
SPARCS (KAIST Software Engineering Club) , Software Engineer & UI/UX Designer - Contributed to Online Timetable and Lecture (OTL), a service for KAIST students. - The app has 10,000+ downloads across Google Play and the App Store.	Mar 2023 – Sept 2025
Run (KAIST Data Structure and Algorithms Club) , Member - Participated in weekly study sessions on data structures and algorithms. - Participated in problem-solving sessions for competitive programming.	Mar 2023 – Sept 2025
Stroke (KAIST Tennis Club) , Training Captain & Coach - Won several regional collegiate tournaments. - Received awards at several national collegiate tournaments.	Mar 2021 – present
