Research Interests

My research focuses on agentic AI and language models, particularly reasoning processes and emergent properties.

Education

B.S. KAIST , B.S. in Computer Science & Artificial Intelligence – Daejeon, South Korea	Mar 2021 – Aug 2027
• Degree period includes 18 months of mandatory military service.	
New York University , Exchange Student in Computer Science – New York, USA	Sept 2023 – Dec 2023

Experience

KAIST Computer Vision Lab , Research Intern	Sept 2025 – present
• Conducted research on agentic AI and language models.	
• Submitted 4 papers as co-author to top conferences (AAAI, ICLR, NAACL)	
Republic of Korea Army , Sergeant	Mar 2024 – Sept 2025
KAIST Concurrency and Parallelism Lab , Research Student	Dec 2023 – Feb 2024
NYU Data Analytics Visualization Team , Research Student	Aug 2023 – Dec 2023
KAIST Computer Architecture and Systems Lab , Research Intern	June 2023 – Aug 2023

Research

AgentRVOS: Reasoning Over Object Tracks for Zero-Shot Referring Video Object Segmentation

Woojeong Jin, Jaeho Lee, Heeseong Shin, **Seungho Jang**, Junhwan Heo, Seungryong Kim
arxiv.org/abs/2603.23489 (AAAI 2027, under review)

- Conceived and implemented the ‘Iterative Spatio-temporal Pruning’ method.
- Achieved state-of-the-art performance in training-free RVOS.

PLAYGROUND: Progressive Layout Generation with Render-Grounded Planning

Jaeho Lee, Junhwan Heo, Junghyun Park, Eunju Yang, **Seungho Jang**, Seongchan Kim, Wonjun Moon, Seungryong Kim
(ICLR 2027, under review)

- Proposed a closed-loop framework for layout generation with iterative visual feedback.
- Conducted visual verifier fine-tuning experiments.
- Designed the paper’s main figure and contributed to manuscript writing.

Ask4NV: Can Learning to Answer Spatial Questions Improve Novel-View Generation?

Jahyeok Koo, Hyeonseo Yu, **Seungho Jang**, Jaewoo Jung, Jiwon Kang, Seokju Cho, Seungryong Kim
(ICLR 2027, under review)

- Proposed joint training of 3D language understanding and novel-view generation.
- Evaluated novel-view image quality and geometric consistency.
- Contributed to manuscript writing.

ReAnchor: Speculative Decoding in Discrete Diffusion

Sanghyun Lee, Jaeho Lee, Jiho Park, Wonjin Nam, **Seungho Jang**, Seungryong Kim
(NAACL 2027, in preparation)

- Tested whether rejected draft tokens retain useful information for speculative decoding.
- Explored learning-based reuse of hidden states from rejected drafts.
- Designed the paper’s main figure.

Honors & Awards

Samsung Research Scholarship

Samsung Research

Sept 2025 – present

National Defense Public Data Utilization Competition Grand Prize

Ministry of National Defense

Aug 2024

- ItDae IpDae: Integrated search service for military enlistment options

Google Solution Challenge Global Top 100

Google

May 2023

- The Voice: Phone scam detector for seniors using conversation content

National Scholarship for Science and Engineering

Korea Student Aid Foundation

Mar 2021 – present

Extracurricular Activities

Include (KAIST Artificial Intelligence Club), Academic Planning Team

Mar 2026 – present

- Facilitated weekly computer vision and natural language processing seminars.
- Organized internal hackathons and academic conferences.

SPARCS (KAIST Software Engineering Club), Software Engineer & UI/UX Designer

Mar 2023 – Sept 2025

- Contributed to Online Timetable and Lecture (OTL), a service for KAIST students.
- The app has 10,000+ downloads across Google Play and the App Store.

Run (KAIST Data Structure and Algorithms Club), Member

Mar 2023 – Sept 2025

- Participated in weekly study sessions on data structures and algorithms.
- Participated in problem-solving sessions for competitive programming.

Stroke (KAIST Tennis Club), Training Captain & Coach

Mar 2021 – present

- Won several regional collegiate tournaments.
- Received awards at several national collegiate tournaments.
