

Seungho Jang

AI Researcher | Multimodal Reasoning, Generative Models & Efficient Inference

develop0235@gmail.com • GitHub / hugeson0235 • LinkedIn / hoosong0235

Education

BS	KAIST , BS in Computer Science & Artificial Intelligence Major GPA: 4.03/4.30 , cumulative GPA: 3.88/4.30 .	Expected Aug 2027
	New York University , Computer Science (exchange student) GPA: 4.00/4.00 .	Aug - Dec 2023

Research Experience

KAIST Computer Vision Lab , Research Intern	Dec 2025 – present
- Research multimodal learning, agentic visual reasoning, and diffusion models. - Conceived and implemented iterative spatio-temporal pruning for AgentRVOS, a training-free video segmentation pipeline combining SAM3 mask tracks with multimodal reasoning.	
KAIST Computer Architecture and Systems Lab , Research Intern	Jun - Aug 2023
Implemented a Completely Fair Scheduler in Rust and evaluated thread response and turnaround times against round-robin scheduling.	

Selected Research

AgentRVOS: Reasoning Over Object Tracks for Zero-Shot RVOS	Mar 2026
Co-author, arXiv:2603.23489. Training-free referring video object segmentation using query-grounded reasoning over object tracks.	

Research Manuscripts

- PLAYGROUND / Ask4NV / Rethinking Tokenization**: ICLR 2027, under review. Layout planning, 3D understanding and generation, and tokenization for discrete diffusion.
- ReAnchor**: NAACL 2027, in preparation. Reuses verifier hidden states for speculative decoding with discrete diffusion drafters.

Engineering & Leadership

SPARCS - KAIST Software Engineering Club , Software Engineering & UI/UX	Mar 2023 – present
Contributed to KAIST's OTL timetable and lecture app, with 10,000+ downloads across Google Play and the App Store.	
Include - KAIST Artificial Intelligence Club , Academic Planning Team	Mar 2026 – present
Manage GPU and cloud resources; organize hackathons and weekly computer vision and NLP seminars.	

Selected Awards

- Samsung Research Scholarship** (Dec 2025 - present); multimodal learning.
- Grand Prize**, National Defense Public Data Utilization Competition (2024); software engineering and UI/UX for ItDae IpDae.
- Global Top 100**, Google GDSC Solution Challenge (2023); The Voice phone-scam detector.

Technical Skills

ML & Systems: Python, PyTorch, C++ , Rust, C, Git, SQL, AWS
Development: JavaScript, React, Flutter, Node.js, Flask, Firebase, Figma
