

Seungho Jang

AI Researcher | KAIST

hugeson0235@gmail.com • GitHub / hugeson0235 • LinkedIn / hugeson0235 • Google Scholar

Research Interests

Multimodal reasoning, generative models, and efficient inference. Current research spans agentic visual reasoning, 3D understanding and generation, and discrete diffusion language models.

Education

BS **KAIST**, BS in Computer Science & Artificial Intelligence – Daejeon, South Korea Mar 2021 - Aug 2027 (expected)

- Major GPA: **4.03/4.30**, cumulative GPA: **3.88/4.30**.
- Degree period includes mandatory military service (Mar 2024 to Sep 2025).

New York University, Computer Science (exchange student) – New York, USA Aug - Dec 2023
Cumulative GPA: **4.00/4.00**.

Experience

KAIST Computer Vision Lab, Research Intern Dec 2025 – present

- Research multimodal learning, agentic visual reasoning, and diffusion models.
- Conceived and implemented iterative spatio-temporal pruning for AgentRVOS, a training-free referring video object segmentation pipeline.

KAIST Concurrency and Parallelism Lab, Research Student Dec 2023 – Feb 2024
Analyzed quantum algorithms.

NYU Data Analytics Visualization Team, Research Student Aug 2023 – Dec 2023
Worked on data analytics and visualization for real-world applications.

KAIST Computer Architecture and Systems Lab, Research Intern June 2023 – Aug 2023
• Implemented a Completely Fair Scheduler for a Rust operating system; evaluated thread response and turnaround times against round-robin scheduling.

Publications

AgentRVOS: Reasoning Over Object Tracks for Zero-Shot Referring Video Object Segmentation

Woojeong Jin, Jaeho Lee, Heeseong Shin, **Seungho Jang**, Junhwan Heo, Seungryong Kim
arxiv.org/abs/2603.23489 (AAAI 2027, under review)

PLAYGROUND: Progressive Layout Generation with Render-Grounded Planning

Jaeho Lee, Junhwan Heo, Junghyun Park, Eunju Yang, **Seungho Jang**, Seongchan Kim, Wonjun Moon, Seungryong Kim
(ICLR 2027, under review)

Ask4NV: Can Learning to Answer Spatial Questions Improve Novel-View Generation?

Jahyeok Koo, Hyeonseo Yu, **Seungho Jang**, Jaewoo Jung, Jiwon Kang, Seokju Cho, Seungryong Kim
(ICLR 2027, under review)

ReAnchor: Speculative Decoding in Discrete Diffusion

Sanghyun Lee, Jaeho Lee, Jiho Park, Wonjin Nam, **Seungho Jang**, Jaewoon Lee, Seungryong Kim
(NAACL 2027, in preparation)

Rethinking Tokenization for Discrete Diffusion Language Models

Sanghyun Lee, Jaeho Lee, Jiho Park, Wonjin Nam, **Seungho Jang**, Jaewoon Lee, Seungryong Kim
(ICLR 2027, under review)

Engineering & Leadership

SPARCS - KAIST Software Engineering Club, Member | Software Engineering & UI/UX Mar 2023 – present
Contributed to the OTL timetable and lecture app for KAIST; the app has 10,000+ downloads across Google Play and the App Store.

Include - KAIST Artificial Intelligence Club, Academic Planning Team Member Mar 2026 – present
Manage GPU and cloud resources; organize hackathons, academic events, and weekly computer vision and NLP seminars.

Honors & Scholarships

Samsung Research Scholarship Dec 2025 - present
Research scholarship focused on multimodal learning.

National Defense Public Data Utilization Competition - Grand Prize Aug 2024
Ministry of National Defense. Software engineering and UI/UX for ItDae IpDae, an integrated search service for military enlistment options.

Google GDSC Solution Challenge - Global Top 100 May 2023
Software engineering and UI/UX for The Voice, a conversation-based phone-scam detector for seniors.

National Scholarship for Science and Engineering Mar 2021
Korea Student Aid Foundation.

Service

Republic of Korea Army, Sergeant | Signals Intelligence Specialist Mar 2024 – Sept 2025
Special Warrior recognition; one General's Commendation and two Lieutenant Colonel's Commendations.

Technical Skills

Research & Programming: Python, PyTorch, C++, Rust, C, Java, JavaScript, Dart, Scala

Software & Tools: Git, React, Flutter, Node.js, Flask, Spring, SQL, AWS, Firebase, Figma

Languages: Korean, English, Japanese; TOEIC 980 (Mar 2023), OPIc IH (Sep 2025)

Selected Coursework

Computer vision; machine learning; deep learning; reinforcement learning; machine learning for 3D data; natural language processing. Fall 2026 coursework includes large language models, generative models, and reasoning AI.
