Research Interests

My research interests focus on Agentic AI and Language Models, particularly Reasoning Process and Emergent Properties.

Education

- B.S. KAIST**, B.S. in Computer Science & Artificial Intelligence – Daejeon, South Korea Mar 2021 – Aug 2027
- Major GPA: **4.03/4.30**, Cumulative GPA: 3.88/4.30.
 - Degree period includes 18 months of mandatory military service.
- New York University**, Exchange Student in Computer Science – New York, USA Sept 2023 – Dec 2023
- Cumulative GPA: **4.00/4.00**.

Experience

- KAIST Computer Vision Lab**, Research Internship Sept 2025 – present
- Researched about agentic AI and language models
 - Submitted 4 papers as co-author to top conferences (AAAI, ICLR, NAACL)
- Republic of Korea Army**, Sergeant Mar 2024 – Sept 2025
- KAIST Concurrency and Parallelism Lab**, Research Student Dec 2023 – Feb 2024
- NYU Data Analytics Visualization Team**, Research Student Aug 2023 – Dec 2023
- KAIST Computer Architecture and Systems Lab**, Research Internship June 2023 – Aug 2023

Research

AgentRVOS: Reasoning Over Object Tracks for Zero-Shot Referring Video Object Segmentation

Woojeong Jin, Jaeho Lee, Heeseong Shin, **Seungho Jang**, Junhwan Heo, Seungryong Kim

arxiv.org/abs/2603.23489 (AAAI 2027, under review)

- Conceived and implemented the ‘Iterative Spatio-temporal Pruning’ methodology
- Achieved state-of-the-art performance in training-free RVOS

PLAYGROUND: Progressive Layout Generation with Render-Grounded Planning

Jaeho Lee, Junhwan Heo, Junghyun Park, Eunju Yang, **Seungho Jang**, Seongchan Kim, Wonjun Moon, Seungryong Kim

(ICLR 2027, under review)

- Proposed a closed-loop framework for layout generation with iterative visual feedback.
- Conducted visual verifier fine-tuning experiments.
- Designed the paper’s main figure and participated writing the main paper.

Ask4NV: Can Learning to Answer Spatial Questions Improve Novel-View Generation?

Jahyeok Koo, Hyeonseo Yu, **Seungho Jang**, Jaewoo Jung, Jiwon Kang, Seokju Cho, Seungryong Kim

(ICLR 2027, under review)

- Proposed joint training of 3D language understanding and novel-view generation.
- Evaluated novel-view image quality and geometric consistency.
- Participated writing the main paper.

ReAnchor: Speculative Decoding in Discrete Diffusion

Sanghyun Lee, Jaeho Lee, Jiho Park, Wonjin Nam, **Seungho Jang**, Seungryong Kim

(NAACL 2027, in preparation)

- Tested whether rejected draft tokens retain useful information for speculative decoding.
- Explored learning-based reuse of hidden states from rejected drafts.
- Designed the paper’s main figure.

Honors & Awards

Samsung Research Scholarship Samsung Research	Sept 2025 – present
National Defense Public Data Utilization Competition Grand Prize Ministry of National Defense • ItDae IpDae: Integrated search service for military enlistment options	Aug 2024
Google Solution Challenge Global Top 100 Google • The Voice: Conversation content based phone scam detector for seniors	May 2023
National Scholarship for Science and Engineering Korea Student Aid Foundation	Mar 2021 – present

Extracurricular Activity

Include (KAIST Artificial Intelligence Club) , Academic Planning Team • Facilitated weekly computer vision and natural language processing seminar • Organized internal hackathons and academic conferences	Mar 2026 – present
SPARCS (KAIST Software Engineering Club) , Software Engineer & UI/UX Designer • Online Timetable and Lecture for KAIST team • 10,000+ download on Google Play/App Store	Mar 2023 – Sept 2025
Run (KAIST Data Structure and Algorithms Club) , Member • Weekly data structure and algorithms study • Problem solving session for competitive programming	Mar 2023 – Sept 2025
Stroke (KAIST Tennis Club) , Training Captain & Coach • Won several regional collegiate tournament • Awarded several national collegiate tournament	Mar 2021 – present
